

## UKWA BEST NEW MEMBER 2015

**“The warehouse was immaculate; their paperwork faultless, and their ambition clear”**

2014 was an interesting year for NNR Global Logistics. The group has been organically growing globally for over 100 years which in itself is fairly unique in today's world. 2014 produced record results for the group, achieved by providing outstanding service to customers and creating new value from a global logistics portfolio.

NNR in the United Kingdom enjoyed continued success with its own careful organic 'expansion with balance' strategy that also resulted in a record year for growth. The company's progression in Contract Logistics is rapid but a natural complement to the previous core competences of international transportation by Air, Ocean, Road and Rail.

“We achieved UKWA membership, gained our Operators License and received ISO 9001, 14001 and AEO accreditation all in our first year. We achieved our objectives – and, as always, On Time and In Full”, said NNR's Tim Dabbs, Head of Contract Logistics.

“We are proud to offer a site that operates to the highest standards and as we are now already nearing capacity, we are planning our next investment to facilitate our rapid expansion”.

NNR plans to drive forward and continue to be recognized as a trusted, premium service provider. Throughout the NNR group is the commitment to promote confidence, comfort and enjoyment. This ethos is evident within the Global Logistics division and will deliver tangible supply chain advantages.

**NNR would like to thank all of their customers and business partners for their amazing and continued support.**

NNR Global Logistics is a member of the **Nishitetsu Group**, a \$4 Billion Dollar corporation of over 18,000 employees with diverse interests and business units.

The group is a highly successful, dynamic group of companies. Those businesses include hotels, trains, buses, taxis, amusement parks, retail stores, and property to name but a few. Central to all operations is transportation and the ability to deliver excellent products to the community.

The group began life in 1908. Formally known as 'Nishi Nippon Railroad', we still proudly carry the NNR acronym today. Over a Century of organic growth has developed a variety of exceptionally customer focused products. A careful and pragmatic approach has always ensured NNR's growth is achieved through 'expansion with balance'.

**Tim Dabbs of NNR receives the award of UKWA Best New Member.**
